OBJECTIVE

As a System Developer with expertise in software development and a passion for cybersecurity, I am dedicated to building high-quality, secure software solutions. I am committed to continuously improving my skills in both software development and cybersecurity, and I am eager to contribute to success in a collaborative, goal-driven environment while growing professionally.

EXPERIENCE

System Developer

National Center for Government Resource Systems

📅 June, 2023 – Ongoing   📍 Riyadh, Saudi Arabia

- Wrote efficient, secure, and maintainable code in programming languages such as C sharp, Angular, ABP, ASP.NET MVC frameworks.
- Delivered software projects within established timelines.

Software Developer Trainee

National Center for Government Resource Systems

📅 Dec, 2022 – May 2023   📍 Riyadh, Saudi Arabia

- Collaborated with cross-functional teams, including designers and testers, to ensure seamless integration of software components.
- Demonstrated commitment to continuous learning by staying updated with the latest technologies, programming languages, and frameworks.

Cybersecurity Incident Response Analyst

Virtual work experience at Misk Foundation - STC

📅 Dec 2022 – Dec 2022   📍 Riyadh, Saudi Arabia

- Generated reports on cyber incidents.
- Dealt with security threats.
- Applied appropriate procedures in order to respond to incidents.
